PROFESSIONAL SUMMARY

- Full-stack developer with over 4 years+ of experience delivering high-quality code and innovative web solutions across various projects and companies.
- Hands-on experience in building and deploying full-stack applications, from e-commerce sites and corporate portfolios to advanced browser extensions with AI integration.
- Proven ability to work with modern technologies, manage projects, and lead teams to successful project completion.
- Passionate about staying updated with the latest industry trends and utilizing strong problem-solving abilities to contribute effectively to projects.

TECHNICAL SKILLS

- **Core Skills:** Full-Stack Development, Project Management , API Development, AI Integration, Browser Extension Development, Team Handling.
- **Languages & Frameworks:** Javascript, Reactjs, Nodejs, Nextjs, Typescript, Express, HTML, CSS.
- **Tools & Technologies:** MySQL, Git, Firebase, Vercel, cPanel.

WORK EXPERIENCE

Full Stack Developer

Flutter Motion, Romania

Nov 2022- Apr 2025

At Flutter Motion, my role evolved from handling initial project management and testing to serving as a full-stack and extension developer. I was given the chance to work with modern technologies on a variety of powerful applications and tools.

- Developed 'WriteGPT', a browser extension that utilizes the ChatGPT API to enhance web and AI capabilities, building the front-end with React.js and the back-end with Node.js.
- Engineered the back-end for 'Supersona', an AI-based profile management tool, by implementing Node.js, LangChain, and the OpenAI API to process and generate AI responses.
- Led the full-stack development of 'Euvin', an online wedding invitation platform, using Next.js and Node.js with Firebase for database and authentication services, and managed deployment through Vercel.

- Built and launched several websites using Next.js, including the official company portfolio for 'Flutter Motion' and a site for the 'FOREIGN INFORMATION SERVICE'.

Full Stack Developer

Bisava Technology, Kathmandu

Jan 2022-Oct 2022

As a Full Stack Developer at Bisava Technology, I was entrusted with end-to-end project development, project management, and team handling responsibilities. In this role, I successfully managed and developed six different projects, working with modern technologies to deliver high-quality web applications.

- Architected and built 'Avani Nepal', a complete e-commerce website, using Next.js for a server-side rendered front-end, Node.js for back-end processing, and MySQL for the database.
- Developed the official website for 'Shiva Travels', a travel and tour agency, creating a compelling landing page that highlighted their services and destinations with the same technology stack.
- Constructed several company portfolio sites, including for 'Bisava Technology', 'DelshaGroup', and 'Sangaii', utilizing a consistent and efficient stack of Next.js, Node.js, and MySQL for each.
- Managed the end-to-end deployment lifecycle for these projects, using a cPanel-managed cloud hosting environment and ensuring site security with the implementation of free SSL certificates.
- Additionally, I contributed to the development of projects for the 'Romania Consulate' and 'DelshaGroup', showcasing my ability to work on diverse client needs.

React Developer

Code Karkhana, kathmandu

Jan 2022-Oct 2022

I joined Code Karkhana as an intern and was quickly promoted to a full-time React Developer position based on my performance and a strong pre-existing understanding of React and its core architecture. In this role, I was instrumental in the development of key projects and expanded my expertise into back-end technologies.

- Developed primary features for two significant projects: "Jobpauchha," a public job portal site, and a large-scale government project.
- Engineered responsive and dynamic user interfaces using React.js and styled with Tailwind CSS.
- Built and maintained server-side logic and APIs utilizing Node.js and Express, marking my

- expansion into full-stack development.
- Managed and interacted with databases using MySQL to ensure data integrity and persistence for the applications.
